

EXCAVATORS

CX290B | CX350B | CX470B | CX700B | CX800B

Fuel efficient power

Fuel efficiency. Turbocharged power. Operator comfort. The B Series excavators provide just what you need. Highly efficient engines deliver more horsepower while using less fuel. Head-to-head tests show that with a Case B Series excavator you'll use 20 to 50 percent less fuel than with the competition, without yielding an inch on performance.

The CX290 through the CX800 feature strong, six-cylinder, Tier III-certified Case engines with charged air cooling for maximum power and reliability. Multiple work modes sense load demands and automatically balance power and speed with efficiency and economy, optimizing productivity on any job site.

Operator productivity is not a worry thanks to our cab environment. Case offers one of the roomiest, quietest excavator cabs in the industry. Floor-to-ceiling glass provides excellent visibility to the bucket for precise control. Ergonomic controls give your operator the power of the machine at his fingertips all day long.

Model	CX290B	CX350B	CX470B
Engine – hp (kW)	207 (154)	271 (202)	362 (270)
Max dig depth – (m)	24 ft 11 in (7.6)	26 ft 8 in (8.1)	27 ft 4 in (8.3)
Operating weight – lb (kg)	65,697 (29 800)	79,065 (35 863)	103,800 (47 083)
Biodiesel rating	B5 approved	B5 approved	B5 approved

Model	CX700B	CX800B
Engine – hp (kW)	463 (345)	532 (397)
Max dig depth – (m)	32 ft 4 in (9.9)	35 ft 0 in (10.7)
Operating weight – lb (kg)	153,400 (69 581)	178,575 (81 000)
