OMMELIFT

Quality since 1906

1750 R (J) Crawler Mounted

Technical Data:	1750 RB	1750 RBD	1900 RJ Fly jib
Max. working height	17.20 m		+ 1.4 m
Max. outreach	10.40 m		
Max. basket load	200 kg		
Basket size	1.25x0.8x1.1m		
Rotation	± 355°		
Battery	24V/400Ah/5h	24V/200Ah/5h	
Charger	24 V/30 A	24 V/30 A	
Diesel engine		14kW/18.8hp	
Generator		24 V/22 A	
Travelling length	5.80 m		+ 0.17 m
Travelling height	1.99 m		
Travelling width	1.10 m		
Operational width	4.60 /3.75 m		
Total weight approx.	2800 kg	2900 kg	+ 100 kg
Gradeability: Across slope up to	30% (16.7°)		
Up and down slope up to	40% (21.8°)		
Stabilization up to	40% (21.8°)		
Proportional controls	+		
230 V outlet in basket	+		
Transformer	O		
Wireless remote control	O		
Non-marking tracks	O		
Automatic set-up and take-down	O		

+ Standard O Optional

Easy set up

Fly jib (option)

- Type 1750RB and 1750RBD are identical apart from the power sources. Standard features include hydraulic stabilizers, turnable basket and proportional controls. The adjustable stabilizer spread provides substantial reduction in operational width. The basket mounting that forms a "fly" boom mounted to the top boom section gives increased outreach over obstacles. The specially designed steel booms made from high and broad profiles allow greater outreach whilst maintaining a high degree of stability and rigidity. Being short in travelling length the platform is extremely manoeuvrable in narrow places. The self-propulsion system is electronically operated by proportional levers comfortably placed in a light weight mobile control box.
- 1750RB is powered by a heavy duty 24 V battery pack. In order to accommodate extreme and long term usage a transformer for direct mains connection is included. This type is especially suited for indoor operation.
- 1750RBD is a battery and diesel engine bi-energy unit. This type is therefore suited for both indoor and outdoor usage. The diesel power pack provides an incredible gradeability of remarkable 40%, equivalent to 21.8°, an environment where lift deployment is also possible. Underlining the general stability is the easy self-propulsion manoeuvrability across a 30% (16.7°) slope. Combined with the strong, non-skid crawler belts this lift type is indeed go anywhere access.
